

EVoline® BackFlip

EVoline® BackFlip

Electricity and water - not a problem.

Always available, but never in the way. When closed, the EVoline BackFlip is only a thin panel on the desktop. Push it with a finger and it rotates by 180 degrees to show its useful side: USB charger and power sockets are

located so far above the panel that they are protected against water running in from the side.

The low installation depth of just 53 mm allows mounting even above drawers or devices.

NEW:
Backflip with
USB C charger
available.

Available with
internationally
approved
sockets.

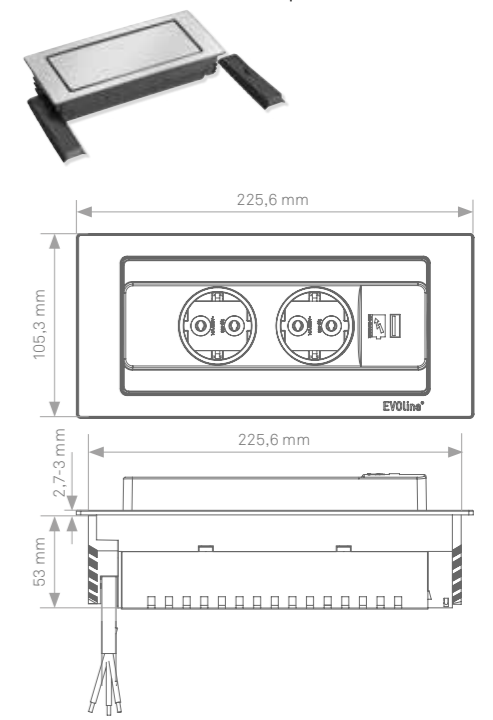

Quick assembly in panels of 10 - 40 mm in thickness.

-  Stainless steel: brushed
-  Stainless steel: brass look
-  Stainless steel: matt black
-  Stainless steel: matt white
-  Glass: glossy black
-  Glass: matt white
